

# Pedestrian Range

The pedestrian walk safe booms are an aluminium, shrouded boom that is light tough and durable. It can be easily transported in a utility vehicle. There are 2 variants. A Hose Fed unit where an umbilical hose is required from a your sprayer, or one with a built in tank and 12v pump. A 12v motorcycle battery is enough to run it for 18 greens between charges. It has a 25lt tank, nozzle flow indicators so the operator can see the flow to each nozzle

The 'WE' range with tank, pump and electric control

The 'WG' range fed from an umbilical from your sprayer

- 3 wheels ensure even & perfect nozzle height
- Light and easily transported
- Available in 3 sizes > 1m > 1.5m > 2.0m
- Easy on / off switch for tank version (WG)
- Easy on/off lever for umbilical version
- Nozzle flow indicators
- Totally enclosed spraying

# Mini Demount Skid Range

The aluminium mini demountable sprayer is ideal for those needing a quick answer to spraying. It can be put onto any utility vehicle. It requires a 12v feed to run the pump. It has an in cab electric control fitted as standard. The tank capacity is 180lt. The boom is 3m. It can be lifted into the truck in minutes. It weighs only 60kg total!

# Windfoil Range

The latest Rogers windfoil range of shrouded booms, are by far the most sophisticated and professional on the market. They are the ONLY windfoil booms that totally enclose the spray whilst travelling over just about ANY ground undulation. A strong aluminium construction and tough durable UV resistant plastic make this sophisticated design very light and leaves no marks on soft greens. The wheels have proper bearings within them and have a grease nipple for lubrication. Triple nozzles are also standard on this boom. Every nozzle has its own flow indicator so the operator can easily see the flow to each outlet. Electric folding wings and electric forward tilt to allow the boom to be dropped so it can enter low door ways. These are standard features.

THE WGF 13 has a 6m boom width

Following a negative contour means NO drift

One complete tunnel across the whole boom with no gaps for wind to alter the spray pattern

This boom can be fitted to ANY sprayer, truck or tractor

# Yard Range

The 'Yard' sprayer is ideal for spraying sensitive areas where drift cannot be accepted at all. It allows you to spray drive ways and small areas without fear of damaging the area surrounding the target. It has a 180lt tank, an electric pump and in cab on/off control. Attaches to any 3 point linkage machine. There is enough agitation to keep the chemical evenly distributed throughout the tank.

Spraying in a force 8 without issue

### What support will I get?

We are the UK's leading golf and amenity spraying specialist. We keep over £500K of sprayer parts in stock in the UK! We have a team of specialists in our own vans with a full stock of parts on board, covering the entire UK. Our professional dealers use us to provide continuous product support for your entire ownership of the machine. We offer onsite annual services and NSTS tests.
